## Professional Summary

Fullstack Developer with 10+ years of experience building, deploying, and maintaining scalable web applications and digital solutions. Skilled in both frontend and backend development, cloud infrastructure, and server management. Strong problem-solving abilities, with proven success delivering scalable, high-performance solutions for clients in industries such as eCommerce and SaaS. Passionate about leveraging technology to simplify everyday challenges and create impactful user experiences.

## Technical Skills

- **Frontend:** Astro, Next.js, Angular, TailwindCSS (ShadCN preferred), MaterialUI, Bootstrap
- **Backend:** Strapi, NestJS, Laravel, CodeIgniter, Core PHP
- **Databases & Infrastructure:** MySQL, MongoDB, AWS, Azure, Google Cloud
- **DevOps & Tools:** GitHub, BitBucket, Docker, CI/CD, Herd, XAMPP
- **Other:** Google Apps Script, HTML5 banners (Google Web Designer, Adobe Animate)

## Professional & Soft Skills

- **Usability awareness:** designing intuitive, mobile-first products with accessibility and SEO best practices.
- **Direct client engagement:** gathering requirements, resolving incidents, and proposing improvements during live calls.
- **Strong communication and team coordination:** ensuring clear collaboration with peers and clients.
- **Problem-solving mindset:** delivering fast, effective, and practical solutions without reinventing the wheel.
- **Constructive feedback:** reviewing peers' work and providing actionable input to improve quality.
